Professional Summary

Software Engineer focusing on Full Stack development and specializing in DevOps practices. I hold a unique background combining a degree in Systems Analysis and Development, postgraduate specialization in DevOps at the prestigious CESAR School, and a Bachelor's degree in Psychology. This intersection enables me to go beyond syntax: I apply clinical active listening to capture real business needs, streamline team collaboration, and dissolve operational bottlenecks in agile environments. All of this is backed by strong hands-on technical skills in container orchestration, VPS provisioning, database tuning, and API design. Focused on optimizing the software development lifecycle (SDLC) while bridging engineering with human-centric goals.

Areas of Expertise

- **Front-end:** Next.js, React, Angular, TypeScript, JavaScript, HTML5/CSS3, Tailwind CSS, Bootstrap, Sass.
- **Back-end & APIs:** Node.js, Express, Python, Django, PyQt6 (Desktop GUI), REST APIs.
- **DevOps & Infrastructure:** Docker, Containerization, Linux Red Hat (RH-124), VPS Hosting, Web Servers, Continuous Integration (CI/CD).
- **Databases & Cloud:** PostgreSQL, MySQL, Supabase, Firebase, Railway Deployments, Whitenoise static serving.
- **Soft Skills:** Empathetic Communication, Active Listening, Complex Problem Solving, Scrum, Kanban, Git/GitHub.

Professional Experience

Freelance Developer | Self-Employed | Remote (Jan 2026 — Present)

- Developing customized web systems focusing on page speed, responsiveness, and clean code architectures.
- Creating tailored web scrapers and automation tools to optimize sales and operations pipelines.
- Integrating payment gateways and developing custom e-commerce structures.
- Project Highlight (Website OdontoVieira): Built with Next.js focusing on local SEO ranking and advanced tag conversion tracking via Google Tag Manager (GTM), driving qualified patient leads to the client.

Full Stack Developer & Implementer | AI Atende | Piedade, Jaboatão, PE (On-site) (2025 — 2026)

- Developed full-stack modules in Javascript and TypeScript (JS/TSX) for AI-driven customer support panels.
- Designed prompt engineering logic and human-computer interactions for automated customer messaging flows.
- Administered VPS server instances and orchestrated microservices running inside Docker containers.
- Customized CRM pipelines (Kommo) and built real-time messaging integrations to streamline response times and client routing.

Education

Postgraduate DevOps Specialization | CESAR School | Recife, Brazil (2025 — March 2027 (Expected))

Technologist in Systems Analysis & Development | Uninassau | Recife, Brazil (2022 — 2025)

Bachelor of Science in Psychology | FACHO | Olinda, Brazil (2018 — 2023)

Certifications

- **Red Hat System Administration I (RH-124 RHA) v10** ■ Red Hat | Enterprise Linux administration.
- **Web Programming Professional** ■ SENAC | JavaScript, TypeScript, Angular, Node.js, Express, SQL, and Firebase.
- **Python Developer Certificate** ■ SENAC | Advanced Python, Django, PyQt6, REST APIs, and Railway deployments.
- **Advanced Speaking & Writing English** ■ SENAC | Professional fluency and technical documentation writing.
