

Júlio Santos

Full Stack & DevOps Developer

Paulista, PE — Brazil | +55 (81) 98660-1822 | juliorasantos@gmail.com
linkedin.com/in/juliorasantos | github.com/Shuralot

Professional Summary

Software Engineer focusing on Full Stack development and specializing in DevOps. Holds a unique background combining a degree in **Systems Analysis and Development**, postgraduate DevOps specialization at the prestigious **CESAR School**, and a Bachelor's degree in **Psychology**. This background enables me to apply active listening to identify core business requirements, enhance agile collaboration, and architect resilient systems with Docker containerization, performant APIs, and CI/CD automation.

Technical Skills & Expertise

- **Front-end:** Next.js (App Router), React, TypeScript, JavaScript, HTML5/CSS3, Tailwind CSS, Angular, Bootstrap.
- **Back-end & APIs:** Node.js, Express, Python, Django, REST APIs, WebSockets (Socket.IO), PyQt6 Desktop.
- **DevOps & Infrastructure:** Docker, Containerization, Linux Red Hat (RH-124), VPS Hosting, Web Servers, CI/CD, Cloudflare Tunnels.
- **Databases & Cloud:** PostgreSQL, MySQL, Prisma ORM, Firebase, Supabase, Railway Deployments.
- **Methodologies & Soft Skills:** Active Listening, Empathetic Communication, Complex Problem Solving, Scrum, Kanban, Git/GitHub.

Featured Projects

Batatoon! — Real-time Multiplayer Word Game | github.com/Shuralot/Batatoon

Stack: Node.js, Express, Socket.IO, WebSockets, Web Audio API, Cloudflare Tunnels

- **Problem & Solution:** Real-time multiplayer vocabulary party game connecting players across browsers, smartphones, and large living-room TV displays.
- **Engineering & Architecture:** Event-driven WebSockets architecture; in-memory lexical engine validating 403k+ terms in **O(1) (<1ms)** via Sets/HashMaps and Unicode NFD normalization; 100% procedural audio synthesized via Web Audio API (**0 KB audio assets**); authoritative server-side FSM preventing cheating with live-typing streams; Cloudflare Tunnels and dynamic QR Code for instant zero-config room entry.
- **Impact:** Smooth multi-device party game experience with sub-millisecond game logic and zero installation friction.

OdontoVieira Dental Clinic — Web Platform & Local SEO | clinicaodontovieira.com.br

Stack: Next.js (App Router), React, TypeScript, Tailwind CSS, Google Tag Manager

- **Problem & Solution:** High-performance institutional web application and organic patient acquisition system for a dental clinic.
- **Engineering & Architecture:** Next.js hybrid static architecture (SSG) engineered for Core Web Vitals; structured local technical SEO with JSON-LD Schema markup; instrumented with Google Tag Manager (GTM) for conversion tracking (CRO) linked directly to WhatsApp scheduling.
- **Impact:** Instant load times, prominent local search ranking, and verified growth in inbound qualified patient inquiries.

Ragnar AI-vs-AI Testing Suite — Adversarial Audit Platform | github.com/Shuralot/TrackTest

Stack: Next.js, TypeScript, PostgreSQL, Prisma ORM, Socket.IO, Evolution API, Docker

- **Problem & Solution:** Platform to orchestrate, audit, and benchmark adversarial interactions between conversational AI models via WhatsApp.
- **Engineering & Architecture:** Full-stack Next.js and TypeScript application backed by PostgreSQL and Prisma ORM; WhatsApp interaction simulation via Evolution API; real-time test telemetry and log streaming over Socket.IO; automated vulnerability scoring and token usage analytics.
- **Impact:** Automated AI agent validation pipeline, pinpointing prompt regressions and security vulnerabilities prior to production releases.

Professional Experience

Freelance Software Developer | Self-Employed | Remote

January 2026 — Present

- Developing customized web systems focusing on page speed, local SEO, responsive design, and maintainable architectures.
- Creating tailored web scrapers and automation tools to optimize operational workflows.
- Integrating payment gateways, customer conversion funnels, and custom e-commerce structures.

Full Stack Developer & Implementer | AI Atende | Piedade, Jaboatão, PE

2025 — 2026 (On-site)

- Developed full-stack modules in JS/TSX for AI-powered customer service environments.
- Designed prompt engineering logic and human-computer interactions for automated conversation flows.
- Administered VPS instances and orchestrated microservices running in Docker containers.
- Automated CRM funnels (Kommo), integrating messaging channels to enhance response times and client routing.

Education

- **Postgraduate Specialization in DevOps** — CESAR School | 2025 — 03/2027 (Expected)
- **Technologist in Systems Analysis & Development** — Uninassau | 2022 — 2025
- **Bachelor's in Psychology** — FACHO | 2018 — 2023

Certifications

- **Red Hat System Administration I (RH-124 RHA) v10** — Red Hat (Enterprise Linux administration).
- **Web Programming Professional** — SENAC (JavaScript, TypeScript, Angular, Node.js, Express, CRUD, SQL, Firebase).
- **Python Developer Certificate** — SENAC (Advanced Python, Django, PyQt6, REST APIs, PostgreSQL, Railway).
- **Advanced Conversational and Technical English** — SENAC (Professional technical fluency for international business).
